DETAILED ACTION

1. Claims 23-39 are pending in this Office Action.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 23-29 and 37-39 are drawn to occurrence counting techniques based on estimated I/O cost, classified in class 707, subclass 4.
- II. Claims 30-36 are drawn to occurrence counting technique based on an estimated CPU, classified in class 711, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such as occurrence counting techniques based on estimated I/O cost. See MPEP § 806.05(d). Invention in Group II has separate utility and occurrence counting technique based on an estimated CPU.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response time for this office action is one month (30 days).
